Given an array of n integers, rearrange them so that the sum of the absolute differences of all adjacent elements is minimized. Then, compute the sum of those absolute differences. Example n = 5 arr = [1, 3, 3, 2, 4] if the list is rearranged as arr' = [1, 2, 3, 3, 4], the absolute differences are |1 - 2| = 1, |2 - 3| = 1, |3 - 3| = 0, |3 - 4| = 1. The sum of those differences is 1 + 1 + 0 + 1 = 3. Function Description Complete the function minDiff in the editor below. Input contains an integer, n, the size of arr. Each of the following n lines contains an integer that describes arr[i] (where $0 \le i < n$). Sample Case 0 Sample Input For Custom Testing STDIN Function arr[i] = [5, 1, 3, 7, 3] + arr[i] = [5, 1, 3, 7, 3] if arr is rearranged as arr' = [1, 3, 3, 5, 7], the differences are minimized. The final answer is |1 - 3| + |3 - 3| + |3 - 5| + |5 - 7| = 6. Sample Case 1 Sample arr[i] = [3, 2] Sample Output 6 Explanation arr[i] = [3, 2] Sample Output 1 Explanation arr[i] = [3, 2] There is no need to rearrange because there are only two elements. The final answer is |3 - 2|

Answer: (penalty regime: 0 %)

Reset answer

```
* Complete the 'minDiff' function below.
 3
     * The function is expected to return an INTEGER.
     * The function accepts INTEGER_ARRAY arr as parameter.
     =/
    #include(stdio.h>
    int compare(const void*a,const void*b)
 9 .
10
        return(*(int*)a-*(int*)b);
11
12
    int minDiff(int arr_count, int* arr)
13 + {
14
        qsort(arr,arr_count,sizeof(int),compare);
15
        int totaldiff-0;
16
        for(int i=1;i(arr_count;i++)
17
            totaldiff+=abs(arr[i]-arr[i-1]);
18
19
20
        return totaldiff;
21
22
```

	Test	Expected	Got	
~	int arr[] = {5, 1, 3, 7, 3}; printf("%d", minOiff(5, arr))	6	6	~

Passed all tests! <

Explanation 1

12 + 12 = 24.

Asswer: (penalty regime 0 %)

Sample Input 1
STDIN Function Parameters
3 - and rice n = 3
1 - arr - [1, 2, 1]
Sample Output 1
Explanation 1
     The first and last elements are equal to 1.
     Using zero based indexing, an [1]=2 is the pivot between the two subarrays.
     The index of the pivot is 1.
